BREAKING NEWS

CDC, UK Gov. & Oxford University confirm COVID Vaccination DOES NOT WORK & has potentially Lethal & Fatal Consequences

BY THE EXPOSÉ ON JANUARY 9, 2023 • (18 COMMENTS)

18

Several scientific studies have emerged that call into question the safety and effectiveness of Covid-19 vaccines, raising alarm bells about the potential harm they may cause and their ability to prevent infection and transmission.

They also suggest that the "vaccines" may increase susceptibility to infection.

These revelations have serious implications for the still ongoing vaccination efforts and call into question the wisdom of ever mandating the public to take these experimental injections.

Because the evidence is now clear.

According to three individual studies published by the US Centers for Disease Control, the UK Government, and Oxford University, Covid-19 vaccines are harmful and ineffective.

with 74% of them experiencing Covid-19 symptoms and 1.2% being hospitalized.

In contrast, the remaining 123 cases were among the unvaccinated population, with only 1 person being hospitalized (0.8%), and no deaths occurring in either group.

The [study](https://www.cdc.gov/mmwr/volumes/70/wr/pdfs/mm7031e2-H.pdf) (<https://www.cdc.gov/mmwr/volumes/70/wr/pdfs/mm7031e2-H.pdf>) also found that viral loads were very similar among the vaccinated and unvaccinated, indicating that both groups were equally infectious.

What is already known about this topic?

Variants of SARS-CoV-2 continue to emerge. The B.1.617.2 (Delta) variant is highly transmissible.

What is added by this report?

In July 2021, following multiple large public events in a Barnstable County, Massachusetts, town, 469 COVID-19 cases were identified among Massachusetts residents who had traveled to the town during July 3–17; 346 (74%) occurred in fully vaccinated persons. Testing identified the Delta variant in 90% of specimens from 133 patients. Cycle threshold values were similar among specimens from patients who were fully vaccinated and those who were not.

What are the implications for public health practice?

Jurisdictions might consider expanded prevention strategies, including universal masking in indoor public settings, particularly for large public gatherings that include travelers from many areas with differing levels of SARS-CoV-2 transmission.

Oxford University Study

An alarming [study](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3897733) (https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3897733) from Oxford University reveals that a Covid-19 vaccine can actually increase the likelihood of contracting and spreading the virus.

IT'S THE FINAL DAY TO SAVE THE EXPOSE - SO LET'S CUT THE BULLSHIT & GET TO THE POINT - WE WILL BE

IT'S THE FINAL DAY TO SAVE THE EXPOSE - SO LET'S CUT THE BULLSHIT & GET TO THE POINT - WE WILL BE FORCED TO DOWN TOOLS & SHUT DOWN UNLESS WE ARE FULLY FUNDED TODAY - Sadly, less than 0.1% of readers currently support us. Despite all staff members testing negative for Covid-19 in May, the first case among the vaccinated group was detected on June 11th.

Upon retesting, 52 additional cases were immediately identified and the hospital was forced into lockdown.

Over the following two weeks, an additional 16 cases were discovered.

The [study](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3897733) (https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3897733) found that 76% of the Covid-19 positive staff developed respiratory symptoms, with 3 staff members developing pneumonia and one requiring oxygen therapy.

Shockingly, the peak viral loads among the infected, vaccinated group were found to be **251 times higher** than those of the unvaccinated staff in March-April 2020.

Findings: Between 11th–25th June 2021 (week 7–8 after dose 2), 69 healthcare workers were tested positive for SARS-CoV-2. 62 participated in the clinical study. 49 were (pre)symptomatic with one requiring oxygen supplementation. All recovered uneventfully. 23 complete-genome sequences were obtained. They all belonged to the Delta variant, and were phylogenetically distinct from the contemporary Delta variant sequences obtained from community transmission cases, suggestive of ongoing transmission between the workers. Viral loads of breakthrough Delta variant infection cases were 251 times higher than those of cases infected with old strains detected between March-April 2020. Time from diagnosis to PCR negative was 8–33 days (median: 21). Neutralizing antibody levels after vaccination and at diagnosis of the cases were lower than those in the matched uninfected controls. There was no correlation between vaccine-induced neutralizing

UK Department of Health & Social Care Study

A [study](https://www.medrxiv.org/content/10.1101/2021.08.18.21262237v1) (<https://www.medrxiv.org/content/10.1101/2021.08.18.21262237v1>) from the UK Department of Health & Social Care reveals that Covid-19 vaccines are potentially harmful and ineffective at preventing infection and transmission.

aged 18 years and older in Alpha-dominant and Delta-dominant periods

In the Delta-dominant period, amongst those ≥ 18 years there was evidence of reduced effectiveness ≥ 21 days after the first ChAdOx1 vaccination (VE 46% (95% CI 35-55%), heterogeneity $p=0.004$), but not ≥ 14 days after the second (67%, 62-71% vs 79%, 56-90% in the Alpha-dominant period, heterogeneity $p=0.23$). There was no evidence

The [study](https://www.medrxiv.org/content/10.1101/2021.08.18.21262237v1) analyzed ongoing population-wide SARS-CoV-2 monitoring in the UK and found that viral loads among the vaccinated and unvaccinated populations were virtually the same and much higher than previously recorded.

The [study](https://www.medrxiv.org/content/10.1101/2021.08.18.21262237v1) also found that the majority of cases among the vaccinated population were presenting with symptoms when they tested positive.

Despite this, the authors of the study maintain that the Pfizer and Oxford/AstraZeneca vaccines are 67%-80% effective at preventing infection with the Delta variant of Covid-19.

However, 82% of the positive PCR tests in the study were fully vaccinated individuals.

This means the authors of the study are essentially lying, and the vaccines are not decreasing susceptibility to infection but are instead increasing it dramatically.

Conclusion

The evidence presented in these studies is disturbing and raises serious concerns about the safety and effectiveness of Covid-19 vaccines.

Not only are vaccinated individuals at higher risk of contracting and spreading the virus, but the vaccines may also be increasing susceptibility to infection.

It is clear that mandating the public to take these vaccines is a harmful and irresponsible act, and those who do so should be made liable for the long-lasting harm they cause.

5

We want the Government to launch a Public Inquiry to investigate the MHRA's process for approving covid-19 vaccines.

Currently there are 25k signatures and need 100k signatures for Parliament to setup an inquiry. Thank you

IT'S THE FINAL DAY TO SAVE THE EXPOSE - SO LET'S CUT THE BULLSHIT & GET TO THE POINT - WE WILL BE

In the message addressed to Father Michel Rodrigue, the Heavenly Father says:

“Satan will attack the physical body of My children...

Satan, through his puppets who rule the world, wants to inoculate you with his venom. He will push his hatred against you to the point of a compulsory imposition that will not take into account your freedom”.

- There is no more Time! Please come back to Me!
- Please don't keep your back to Me!
- Children, I accept every word that comes out of your mouths!
- Every prayer of yours I use against satan!
- I never abandon you!
- I have extended My Hand to this generation through My Daughter Mary!
- This 3rd world war will not be won by anyone. This war is not of Me. This is a satanic war!

God is telling us to forgive ourselves and everyone, to pray for all, for we are all His children, some of us lost, putting on the garment of the world, some even carrying the flag of satan.

God warns us of earthquakes, war, the fall of the economy and that money will be no more, famine, more pandemics, floods, drought and the fall of heavenly bodies or fire from heaven.

Mother of God, quotes from Messages:

- Love My Jesus!
- Poison will kill you but not immediately but slowly!
- Wrong science!
- Spiritual warfare!

Jesus Christ, quotes from Messages:

- Every child who has come to earth has been called by name by My Father!
- I have told your hearts, what you must do!
- Our Immaculate Hearts, My Mother's and Mine are waiting for you!
- Stop beating My Nails and pinning My Crown on My Head! (referring to consensual abortion and assisted suicide)
- Awakening and Union!
- I do not interfere in your Free Will!
- 5G can kill you instantly!
- The sun is no longer your friend!
- Prepare yourself physically and spiritually!
- Eat what no one should eat!
- You'll end up with azymes!
- You'll live like the old days!
- How many of you have been vaccinated with Me?
- They want to wipe most of My children off the face of the earth!
- You'll see them lying dead in the street! (referring to the vaccinated)
- Use the remedies of Heaven given by My Mother!

(Book: Natural Herbs and Remedies Given by the Blessed Virgin Mary for the Treatment of Diseases, Plagues, Emergencies and Pandemics)

- Money will no longer be as you know it now!
- For those vaccinated so as not to die but also for hemorrhagic diseases, use Good Friday Oil, exorcised water and prayer to My Blood, no plague or virus resists against My Blood, Good Samaritan's Holy Oil, for viruses, bacteria, chemicals in the air, etc. Holy Archangel Michael's Oil for skin diseases, etc (geranium). Whole Fumitory plant.
- Grapes Blessed in case of famine, war, pandemics, collapse of economy, disappearance

These 'studies' are coordinated control of the narrative. They pre-suppose that 'covid-19' exists and can be spread, which is a fabrication. It never existed and was a pretext for enforcing the viads jab. The 'authorities' are using 'sudies' to legitimise what they did and are doing.

Since the patent history of the engineered coronavirus is evident, and indications that the "covid19 injectables" were developed BEFORE the a "pandemic" was even called for/declared — it seems what you may be drawing the right conclusion. Since all aspects of covid "variant" tracking comes out of computer simulation, is there any relity in reports of the latest frightful "variant"?

However, the acknowledgement that the vaccinated are not stronger for being vaccinated — that does not look good no matter what the fabrication about "variants".

Hi Stephen,
As well as enforcing the masks etc.
I had to attend Local hospital for a check up,
I refused to have the PCR test and was told to leave.
Is it true that the used PCR test swabs are being sent to China ?
Remember the used kits have your name and address and your DNA inside. Why do they want this information.

The animal trials failed because all the animals died. Therefore clinical human trials were just omitted from the process. Science told them this would be fine. And people were grateful to get this sh** pumped into to them. What a clown world.

I am not vaccinated against so called covid19. I love living natural and taking care of myself as much as possible. I transformed covid restrictions to make better myself. I joined gym, started researching healthy ways to live and researched what is behind this covid nonsense thanks to lots of free time that they give us by ordering to stay at home. It really opened my eyes and I don't see the world as I see in 2019. Ivermectin is bashed even though doctors have proven that it works. You can take care of your entire self by visiting <https://ivmpharmacy.com> (<https://ivmpharmacy.com>)

“Shockingly, the peak viral loads among the infected, vaccinated group were found to be **251 times higher** than those of the unvaccinated staff in March-April 2020.”

Actually, the study states viral loads in those infected with Delta in June 2021 were 251 times higher than those who had been infected with earlier strains (presumably alpha variant) in March-April 2020.

unless we have data which provides the mean levels of viral load for each strain. Perhaps delta is usually associated with much higher viral loads. It's important to provide the most precise information when revealing the dangers of these experimental injections.
